An Interactive Guide To The Fourier Transform ...

Sat, 06 Jul 2013 23:53:00 GMT

This is a shifted version of [0 1]. On the time side we get [.7 -.7] instead of [1 -1], because our cycle isn't exactly lined up with our measuring intervals, which are still at the halfway point (this could be desired!). The Fourier Transform finds the set of cycle speeds, amplitudes and phases to match any time signal.

DSP Generation of Pink Noise - First Principles

DSP generation of Pink (1/f) Noise Looking at how to generate pink noise by two methods: 1 - A "pinking" filter for white noise. 2 - The Voss-McCartney algorithm of adding multiple white noise sources at lower and lower octaves.
