There are two fundamentally different causes for human origins: blind natural processes (chance-law) or purposeful intelligent design. The chance-law hypothesis, neo-Darwinian evolution, states that humans arose through random mutations preserved by blind natural selection.

Homo sapiens, modern human, Pleistocene human evolution, Africa Author for correspondence: Chris Stringer ... The first question which should be addressed in any discussion of the origin and evolution of Homo sapiens is which diagnosis of the species is going to be used. A paper using the classic multiregional concept of H. sapiens [1,2]
